Task 1

---

1. Draw the SDLC Phases and the deliverable of each phases

Restricted Information and Basic Personal Data

2. Fill a table that maps each phase to our Course Registration project

Course Registration project			
Phase		**Deliverable**	**Mapping**
1	**Planning**	**Project Plan**	Map project scope, estimate budget, and assess the technical feasibility of thousands of concurrent registrations.
2	**Requirement**	**SRS Document**	Gather registration requirements from registrar, faculty, and students (adding/dropping courses, Capacity limit)
3	**Desigan**	**UML,DB and screens**	Create database schemas for students, courses, and schedules; design UI wireframes for student portals & staff views.
4	**Implementation**	**Source code**	Build the front-end course browsing interface and back-end registration algorithm/ prerequisite checks.
5	**Testing**	**Test cases and report**	Execute load/stress testing to handle enrollment "rush hour", and functional tests for add/drop work flows
6	**Deployment**	**Released system, user manual**	Launch the live system on university servers and integrate with active student/faculty database systems.
7	**Maintenance**	**Fixes and updates**	Run ongoing patch support, monitor performance during registration periods, and apply database back-ups and security fixes.
